

O2 Buffer Panel

The AAI Oxygen Buffer Panel is used to safely operate the O2 Injection Panel that is located in a Sat Bell or HRC through a set of metering valves and a small expansion cylinder.

Features:

- Sulfinert® Treated Swagelok® Sample Cylinders
- 1,000 cc Cylinder D.O.T. rated to 1800 PSI at room temperature
- All cylinders are made of 316 stainless steel, and have ¼" female NPT threads on both ends
